Prospective Computer Science Engineer. Strong Passion and work in AI, Robotics, and problem-solving with notable achievements. Proficient in Python, with experience in Java, C, Full Stack etc. Beyond tech, a FIDE-rated chess player and an avid table tennis enthusiast. Skilled in Management.

Education

The National Institute of Engineering, Mysuru

Sep 2023 - Sep 2027

Bachelor of Engineering in Computer Science and Engineering

Salwan Public School, Mayur Vihar, Delhi

Apr 2021 - Mar 2023

High School Certificate in Science with CS

Core Skills

Languages and Development Tools: Python, JAVA, C, HTML, CSS, JavaScript, TypeScript

Tools: Unix, Version Control System (Git), REST APIs

Databases: SQL/NoSQL, MySQL, PostgreSQL, MongoDB

Python Packages: Django, Tkinter, Langchain BeautifulSoup, Pyttsx3, Pymysql, FastAPI

Framework and Libraries: ReactJS, Node.js, Tailwind CSS

DevOps: Jenkins, GitHub Actions, Docker, AWS (EC2, S3, EBS Amplify)

Experience

Computer Society Tech Lead at NIE IEEE Student Branch

May 2024 - Dec 2024

- Lead the Computer Society of 90+ members while being a part of Executive Committee at NISB.
- Organized multiple technical events, including the flagship event Rubix 2024.
- Actively participated and won in events like IEEE Xtreme, Ankura, CodeMaze, Adroit, etc.

Member at Robotics Club

Nov 2023 - Jan 2025

- Volunteered at Roborikishi, guiding over 100 school students in Mysuru about Robotics and Arduino.
- Worked with robotic equipment and Arduino and participated in robotics competitions, including Enigma-24 at Malnad College of Engineering, Hassan.

Projects

Patient Care Application (Twilio, React.js, TypeScript, Tailwind CSS, Node.js, MySQL)

Apr 2025 - May 2025

- Built a secure web app for efficient patient record management and analytics for clinics.
- Integrated WhatsApp e-receipts via Twilio for automated patient notifications.
- Crafted elegant data visualizations and dynamic stats for clear patient insights.

Clock using CircularLL_and_AIAssistant (Python, LangChain, Cohere, Turtle, Tkinter)

Nov 2024 - Dec 2024

- Developed a modular analog clock in Python using circular linked lists and OOP for precise cyclic timekeeping with a synchronized digital display.
- Created an interactive DevBuddy chatbot using LangChain-style RAG for project queries.
- Designed threaded architecture with Turtle (analog) and Tkinter (digital) for concurrent clock design.

Delhi Metro Transit Corporation and ChatBot (Python, matplotlib, pyttsx3, WeatherAPI)

Oct 2022 - Jan 2023

- Developed a Python-based metro guide providing route details, fare estimates, and travel times across about 230 stations using Matplotlib for mapping and MySQL for data storage.
- Incorporated METROBOT, an AI chatbot, for user queries, FAQ, and assistance.
- Designed real-time news, weather information along with in-chat Wikipedia access in Metrobot.

Achievements

ICPC Regionalist – 2025 Asia West Amritapuri Multisite Regional Contest

Nov 2025

Attained selection to the 2025 ICPC Asia West Amritapuri Multisite Regional Contest after clearing the qualifying rounds in one of the most prestigious competitive programming competitions worldwide.

2nd Position at CP (Competitive Programming) Potpourri, Shastra Fest at IIT, Madras

Jan 2025

Competed against the brightest minds nationwide and secured second place in the CP (Competitive Programming) Potpourri event at Shastra '25 Techfest held at IIT Madras.
